Identity and Access Management
Identity Governance and Administration

Empower Your Business with Secure and Efficient Identity Management

At Infocentric, we understand the critical importance of effective Identity Governance and Administration (IGA) in today's rapidly evolving digital landscape. Our comprehensive IGA solution empowers your organization with the tools and capabilities needed to ensure secure access, streamline processes, and enhance compliance.

Key Features:

Centralized Identity Management: Seamlessly manage user identities and access rights across your organization from a single, user-friendly interface. Say goodbye to scattered access controls and hello to unified identity management.

Access Request and Approval Workflow: Streamline access requests and approvals with automated workflows, reducing administrative overhead and ensuring quick and accurate access provisioning.

Role-Based Access Control (RBAC): Assign access based on roles, responsibilities, and job functions, enhancing security and simplifying access management.

Policy Enforcement: Implement robust access policies and enforce compliance with industry regulations effortlessly, minimizing risks and maintaining audit-ready status.

User Lifecycle Management: Efficiently manage user onboarding, transfers, and offboarding, ensuring that access privileges align with organizational changes.

Risk Management: Identify and mitigate access-related risks through continuous monitoring, alerting, and reporting, bolstering your organization's security posture.

Why Choose Infocentric?

Expertise: With years of experience in IT and marketing, we possess a deep understanding of both technology and customer needs, ensuring a tailored IGA solution that fits your unique requirements.

Innovation: Our cutting-edge technology and forward-thinking approach enable us to stay ahead of emerging threats and industry trends, keeping your identity management strategy future-proof.

Customization: We recognize that every organization is unique. Our IGA solution is fully customizable to adapt to your business processes, ensuring optimal performance and user experience.

Proven Track Record: Infocentric has a proven track record of delivering successful IGA implementations to businesses of all sizes and industries, earning us a reputation as a trusted partner.
